## MEMORANDUM OF OBJECTS AND REASONS

General Consumption Tax ("GCT") is a value added tax on consumption, imposed under the General Consumption Tax Act, which is applied on the value added to goods and services at each stage in the production and distribution chain. It is included in the final price the consumer pays for goods and services whether imported or bought locally.

This Bill seeks to amend the General Consumption Tax Act in order to introduce a GCT group accounting regime which would provide for a group of entities, with the approval of the Commissioner General, being treated as a single taxpayer for the purposes of the Act.

This new regime would achieve cost and resource efficiencies through—

- (a) the optimization of the business structure of a group of entities, and cost cutting, by the use of shared service centres, also known as "Centres of Excellence";
- (b) the elimination of the risk of incorrect GCT treatment of intra-group transactions, as no GCT will be applicable to intra-group transactions;
- (c) the creation of positive cash flow, especially in situations where one entity within the group may have GCT refunds pending, while other entities within the GCT group may have liabilities, as set-off between the two positions will be accommodated.
