MINISTRY PAPER # 59/17

MINISTRY OF EDUCATION, YOUTH AND INFORMATION

UPDATE ON FUNDING ARRANGEMENTS FOR INFANT, PRIMARY, ALL AGE AND JUNIOR HIGH AND SECONDARY INSTITUTIONS FOR 2017/2018 ACADEMIC YEAR

1.0 INTRODUCTION

Members are being asked to note the Ministry of Education, Youth and Education's intention to follow policy guidelines for funding arrangement implemented in the previous year in relation to the provision of Government grants and subventions to Infant, Primary, All Age and Junior High and Secondary institutions respectively. For the 2017/2018 school year the Ministry will continue to fund the education system from the approved budget by utilizing the same arrangements to ensure that schools are supported in the most efficient manner.

2.0 BACKGROUND

By way of Cabinet Decision No. 12/16 dated April 18, 2016, Cabinet noted the Ministry's intention to provide increases in Government subventions for tuition fees at the secondary level; this was implemented in September 2016.

The changes were proposed by the Ministry of Education, Youth and Information for the new funding arrangements for secondary schools against the background of the need to remove the burden of fee payment from parents and the trialing of the policy guidelines for the 2016/17 school year coupled with island wide consultations with stakeholders. These changes are in keeping with the Ministry's long term goal of ensuring equity and access for all and the provision of quality education.

The basis of this policy is not to decrease schools' funding but to provide more resources for subvention, special support, maintenance and capital works expenses. The Ministry's philosophy is that public education should be properly funded by the Government while encouraging stakeholders to make voluntary contributions. Schools should therefore not be forced to charge fees for services that the Ministry should be providing. It is prudent therefore, that public education be funded from taxes and not from fees charged by schools at the point of access.

3.0 FUNDING ARRANGEMENTS

For the school year 2017/2018 funds will be allocated to the secondary and primary system based on the following:

- The allocation of the budget for the school year should reflect the student enrolment for that particular year including any change to the school population.
- Enrolment in keeping with the number of places approved by the Ministry

- Additional funding provided at the Infant and Primary levels should be used for the purpose of expenses related to general operations as well as the procurement of materials for the teaching and learning process.

4.0 MOEYI COMMITMENTS

4.1 Secondary Schools

The MoEYI will honour its commitment to increase funding for secondary schools' operations for the academic year 2017/2018 from an approved budget of \$34.3 Billion. (Please see **Appendix I**). All schools will receive at least \$17,000.00 for regular grants while those with students on PATH will receive an additional amount of \$2,000.00.

Based on the budgetary allocation for the 2017/18 financial year, some schools will receive an average of \$190,000 per student which will include provisions for areas such as Subvention, Furniture, Apprenticeship Programme, Staffing Support, CAP Support, STEM, TVET, Maintenance, Infrastructural works and ICT support. Please see **Appendix II**. It is proposed that no more than 10 % of the Ministry's allocation should be used for sports or co-curricular activities.

Additionally the Ministry will absorb costs for all core services. The list of core services are outlined in the draft document at **Appendix III** titled – “A CONCEPTUAL FRAMEWORK FOR A COMPREHENSIVE SECONDARY PROGRAMME”. A review of the core services has been carried out to ensure that the costs for these services including additional staffing are absorbed by the Ministry; this will also reduce the need to request further support from parents. The directives are that additional staff should not be hired without the Ministry's approval and where there is the need for major infrastructural improvements or maintenance schools should request the support from the Ministry one year in advance; emergency cases will be treated as such. Resources for schools delivering the Career Advancement Programme (CAP) or NVQJ/City and Guilds Programmes will be provided by the Ministry.

The following resources will also be provided to secondary schools as needed:

- Additional teachers for those schools that are operating below their required establishments or require teachers for specific programmes based on attainment level of students on entry;
- Material grants for schools pursuing the Technical and Vocational Areas;
- Equipment for selected schools under particular programmes or initiatives, for example, schools on Alternative Pathway for Secondary Education (APSE), schools transitioning from shift to whole day or extended day operations, new schools or schools introducing new Technical and Vocational programmes; and provision of additional classrooms and infrastructure upgrade for selected schools based on initiatives or programmes.
- Solarization of at least 30 schools to reduce their energy bill payments and reduce costs.

- Literature books for students on PATH.
- Payment of insurance for students on PATH and Wards of the State.
- Allocation of the \$2,000.00 grant under PATH to be used to cover the cost of IDs and uniform and other related items for those students.
- Book vouchers for the neediest students up to \$2,000.00 per student.

4.2 Infant Primary, All Age and Junior High Schools

Funding for the Infant, Primary, All Age and Junior High Schools was increased for the academic year 2017/2018 from the approved budget of \$1.3B. Please see **Appendix IV**. Based on the budgetary allocation all Infant and Primary level students will receive \$2,500.00 per student; an increase of over 169% or from an average of \$850.00 per student while All Age and Junior High Schools will receive \$19,000.00 per student up from \$1,100.00, an increase of over 1000% percent.

The following resources will also be provided to Infant, Primary, All Age and Junior High schools as needed:

- Additional teachers for those schools that require special support based on the nature of the students and special programmes being offered.
- Additional classrooms and infrastructure upgrade for selected schools based on initiatives and/or programmes.
- Installation of LED lighting in schools for the new school year.
- Literature books will be provided for students on PATH at the All Age and Junior High levels.
- Payment for insurance will be made for students on PATH and Wards of the State at all levels.
- Allocation of \$2,000.00 for PATH to be used to cover the cost of ID and uniform related items for those students at the All Age and Junior High Levels.
- Book vouchers will be provided for the neediest students up to \$2,000.00 per student

The schools will however continue to be provided with maintenance grant of \$50,000.00 per school along with a janitorial grant of \$172,000.00.

4.3 Disbursements of Payments

The payments to schools will be made in four scheduled timely disbursements as follows:

- i. The first tranche will be disbursed in the second week of June 2017

- ii. The second tranche to be disbursed in the second week of September, 2017.
- iii. The third tranche in the second week of December, 2017.
- iv. The fourth tranche will be paid in the second week of April 2018.

The first tranche of the regular grants was disbursed in June while preparations are being made for the disbursement of the second tranche.

5.0 OTHER CONSIDERATIONS

- Schools falling short of funds during the course of the year have been notified that they can write to the Permanent Secretary to request consideration for additional support to close the deficit.
- The term ‘Auxiliary Fees’ will be abolished and replaced with the term ‘Parent Support Contribution’.
- Parent Support Contribution from parents will be strongly encouraged; however no child is to be disenfranchised.
- The Ministry will ensure that schools whose budgets require additional support will be given consideration. Careful review of the operating costs of these institutions will be made and an allocation provided, if necessary, within one month of request.
- Schools can work in partnership with their Parent Teachers’ Associations to determine the level of contribution that can be afforded to assist in the long term development of the school or for special projects.
- The Ministry together with the National Parent Teachers’ Association of Jamaica (NPTAJ) will continue to engage and encourage all parents to make the contribution approved by the Boards, PTAs, and Ministry.
- Where there is the need for major infrastructural works schools should submit requests to the Ministry.

6.0 COMPLIANCE - Parent Support Contribution

The Ministry has adopted a non-obligatory policy towards the payment of parents’ contribution even whilst it continues to work with the National Parent Teachers’ Association of Jamaica and its other stakeholders to encourage parents to make contributions and to invest in the long term development of schools.

CONFIDENTIAL

It is to be noted that the average compliance rate for the Academic Year 2016/2017 is 63.3%.
The parent support contribution compliance rates for the Academic Year 2016/2017 listed by schools and regions are attached respectively at **Appendix V** and **VI**.

Senator the Hon. Ruel Reid, CD, JP
Minister

A CONCEPTUAL FRAMEWORK FOR A COMPREHENSIVE SECONDARY PROGRAMME

Introduction

Education plays a major role in improving health, reducing poverty, creating wealth, enhancing human security and enabling active participation in a globalised world. Education is also critical in creating a culture of peace, tolerance and mutual respect and is fundamental for the development of democratic values and good governance (Commonwealth Heads of Government Meeting, 2007). As cited in the Task Force on Educational Reform in Jamaica 2004, 'the value of education as an agent of national development cannot be overemphasized' and as such, young people should be provided with access to quality education to ensure the holistic development of the individual. Education with a focus on holistic development will afford for relationships that will nurture positive values and attitude among citizens.

Historical Background to the Rationalization of Secondary Education

In the mid to late 90s, the education system saw the introduction of various programme aimed at reforming secondary education. Significant among these were the following:

- Reform of Secondary Education(ROSE) : ROSE I ,which aimed at improving the quality and equity of educational provisions at the secondary level through the establishment of a common national curriculum for all students at Grades 7-9 and ROSE II which expanded access to upper secondary level education (Grades 10-11) (NESP 2012).
- A common core of subjects was selected for the lower secondary level which included Language Arts, Social Studies, Mathematics, Science and Resource and Technology. Additionally subjects were taught including the aesthetics, a foreign language, Physical Education.
- At the upper secondary level students were expected to pursue six (6) subjects including English Language, Mathematics, Technical and vocational (one of no more

than 5 technical subjects offered by the school) and a minimum of three (3) other that will allow for matriculation to a tertiary programme or the workplace.

Support for the delivery of the curriculum was provided through the:

- Provision of textbooks for all students (The Secondary Textbook Project), and
- Increased provision for in-service and pre-service training of teachers, and

Current Situational Analysis

Since 2012, there has been extensive revision of the curricula for grades 1-9.

- A multi-disciplinary integration approach was taken with the Grades 1-3 curriculum and Information and Communication Technology (ICT), Civics, Aesthetics and TVET skills were infused throughout the curriculum. The focus on Literacy and Numeracy is maintained through the Language Arts and Mathematics Programmes (windows) that allow more time for children to be guided as they explore these areas.
- For Grades 4 - 6, Spanish, Civics and Resource and Technology are added to the suite of core subjects included in the Revised Primary Curriculum (RPC).
- At the Grades 7-9 and Upper Secondary levels Civics is added as a discrete subject and History and Geography are being offered as separate subjects at Grades 7-9. Physics, Chemistry and Biology will also be offered as discrete subjects at Grade 9.
- The curriculum emphasizes educational approaches such as:
 - The integration of Science, Technology, Engineering and Mathematics (STEM) and in some cases, the Arts, to provide STEAM related experience.
 - The integration of 21st Century skills such as the 4Cs (Critical Thinking, Communication, Collaboration and Creativity).
 - Culture in Education to influence the development of values and attitudes.

Also, at the primary level the Proficiency Pathways are provided as a means of early identification and early intervention to the observed or assessed performance gaps of students. Instructional leaders are guided in determining the most effective ways to organize instruction

and intervention to eliminate or reduce the gaps. It is therefore expected that performance will improve at the lower levels and as such more students will acquire quality secondary education. Hence it is imperative that the alternative pathways for secondary education be implemented.

Alternative Pathways for Secondary Education

The secondary pathways will provide a programme of instruction informed by the National Standards Curriculum (NSC) and the students' demonstrated competence on the benchmarks of the Grade Six Achievement Test and later the Primary Exit Profile (PEP). The provision of multiple pathways to secondary education recognises that students function at varying levels and multiple intelligences. As such the methodology of instruction will therefore be characterised by:

1. Differentiated Instruction
2. Interactive and learner –centered project-based and problem-based learning
3. Reflection
4. Alternative forms of assessment using the competency based education and training principles (portfolios, projects, oral assessment, verbal reasoning along with written assessments, etc.)

The Secondary Pathways will be accessed at the end of Grade 6 via the PEP/GSAT. The following options are being proposed for the secondary pathways:

Secondary Pathway I (SP I)

Students who are placed on SP I will access the NSC, Grades 7-9 and the relevant syllabi and programmes for Grades 10 through Grade 13. All students will be allowed to access the exit examination option that best suits their ability

Secondary Pathway II (SP II)

Secondary Pathway II is a two-year transitional programme for students needing moderate additional instructional support. In addition to their performance data from GSAT or PEP,

students will be further evaluated at the end of Grade 8 to determine their readiness to cross over into Secondary Pathway 1 or Secondary Pathway III.

Confidential

Secondary Pathway III (SP III)

This pathway is a seven year programme which will provide a customised programme of instructional support to Grade 9, and based on Career Interest Inventory these students will transition into the Career Advancement Programme and Apprenticeship programme to Grade 13. These students will be instructed through functional academics curriculum in core subjects while providing other enrichment activities.

Core Subjects and Services

The Ministry of Education, Youth and Information is currently revising the Student Assistance Programme (tuition payment) and will undertake to provide support for core subjects and services to students at the lower and upper secondary levels. This is with a view to reduce the funding gap that exists in the education system by seeking parent's/ guardian's contribution to other areas /services of interest to his/her child. In keeping with the National Curriculum Policy and Revised National Standard Curriculum the following subjects will be funded at the different levels:

Lower Secondary

The core subjects for Grades 7-9 will include:

- Language Arts – that must include Language, Literature and Reading (Communication Skills)
- Mathematics
- Technical and vocational subject
- Integrated Science
- Enrichment areas such as Personal Empowerment, Health and Family Life Education, Religious Education
- Modern Language (Spanish / French / Mandarin)
- Physical Education
- Civics
- Creative Arts (Music/ Drama/Dance /Visual and Performing Arts)

A Rotation Model is to be used to ensure that students are exposed to the disciplines that emphasize the development of:

- Values and attitudes (moral thinking) and spiritual development
- The physical body
- Natural gifts/talents

The subject areas are to be experienced in meaningful, yet practical and fun-filled ways.

To influence the organization of the schedule for learning, it is recommended that subject areas be selected for students based on their profile and the school situation using the following categories and as represented in the framework in table 1 below:

- Enrichment
- Exploratory Core
- Work-Based/Problem Based Drivers – Technical/Vocational/Resource and Technology Projects
- Creative Expressions

Table 1: Schedule of Learning Framework

Categories Of Learning Experiences For All Students	Purpose & Emphasis	Examples Of Forms Of Knowledge	Factors To Consider
ENRICHMENT:	Catering to the whole person with an emphasis on the interrelated nature of mind, spirit, body. (holistic learning)	Physical Education & Movement Spiritual Education Health & Family Life Guidance Personal Development	Students should be exposed at least once daily. One or more forms of knowledge may be a part of the schedule based on the needs of the group and the agreed roles and responsibilities of learning facilitators
PROBLEM-BASED DRIVERS	Real-Life problem solving in context	Investigation through Projects Resource & Technology Technical Vocational Learning/Education	All students should be scheduled to study a problem using either Project-Based Learning or STEM/STEAM integration or specialization in a vocational programme
EXPLORATORY CORE	Enhancing problem- solving in context while catering to intellectual development	Natural Sciences Social Sciences/History Languages	All students must be exposed to least one form of knowledge from each of the three areas indicated or from other related areas
CREATIVE EXPRESSION	Enhancing imagination/creative thinking, reflection and aesthetic dimension of learning	Music Drama Dance Visual Art	All students must be given the opportunity to learn through the creative modes

Upper Secondary

The suggested recommendation for Grades 10 and 11 is a maximum of eight(8) subjects and a minimum of six (6) subjects. The students' choices must include English Language, Mathematics, a Technical and Vocational subject, a subject from the social science, a subject from the natural sciences. The remaining choices will be dependent on the students' career path and the number of subjects needed to matriculate to a Tertiary programme or the workforce.

In congruence with the Technical and Vocational Rationalization Programme, no school should offer more than five (5) Technical Vocational Areas. In addition, consideration should be given to the following:

- the hours to be allocated to each subject area
- a limit to the number of subjects offered by the school
- the capacity of the school to offer the areas in terms of space and resources
- the maximum number of subjects to be funded by the Ministry of Education
- the use and deployment of resources to maximize opportunities for success.

Other areas being considered for funding by the Ministry of Education, Youth and Information include the development and upgrading of facilities and infrastructure, paying of utility bills and other special projects that are necessary for the core of education being provided for the students. In addition to the aforementioned, core services for the Secondary level schools will include:

- Physical Education
- Guidance and Counselling
- Health and Family Life Education
- Security and Safety
- Plant Maintenance
- Behaviour Management
- Support to uniformed groups
- Curriculum Support Materials
- Students Nutrition Services

Confidential

The Ministry is proposing that the use of the term auxiliary fees be discontinued. Therefore, the costing of all consumables and non-core activities that directly benefit students should be done in consultation with parents for their contribution.
