**PRESENTATION OF BILLS  
WITHOUT LEAVE OF THE HOUSE FIRST OBTAINED**

## GOVERNMENT BUSINESS

**1.** The Minister of Labour and Social Security to move that a Bill entitled, "*AN ACT to Amend the National Insurance Act to increase the contributions paid to the National Insurance Scheme and increase the benefits payable under the National Insurance Scheme; to validate and confirm the payment of certain benefits made in good faith by persons acting on behalf of the National Insurance Fund, and the collection of contributions done in good faith, and to indemnify certain persons in respect of those payments and contributions; and for connected matters*" be now read a second time.

Notice of second reading given on 26.01.2021.

## PRIVATE MEMBERS' MOTIONS

### NOTICE GIVEN ON TUESDAY, 27TH OCTOBER, 2020

1.

[No. 1]

**Mr Fitz Jackson** to move that a Bill shortly entitled "*The Banking Services (Amendment) Act, 2020*" be now introduced and read a first time.

### NOTICE GIVEN ON TUESDAY, 3RD NOVEMBER, 2020

2.  
2]

**Mr. Hylton – To move –**

[No.

WHEREAS the current network of drains and gullies existing in the Corporate Area and throughout the country has been in a deplorable condition for several decades, due to the lack of sustained maintenance and repairs over those decades, and was never designed to handle the increased run-off of storm water resulting from increased development of the physical infrastructure, and exacerbated by the frequency of heavy rainfall due to climate change;

AND WHEREAS Marcus Garvey Drive and Mandela Highway, the main arterial roads linking the industrial belt with the Port of Kingston through which the island's major commerce with the rest of the world is conducted, recently experienced severe flooding, leaving commuters stranded for several hours following heavy rainfall in the vicinity of those thoroughfares;

AND WHEREAS much of the waste water from industrial activities, as well as from sewer mains, end up in our existing drains and gullies, and which, among other harmful effects, represent a continuing threat to the health of many of our citizens, especially in poorer communities located near to those existing drains and gullies;

AND WHEREAS successive budgets have not been able to adequately fund the maintenance and repairs of the existing drain and gully networks:

BE IT RESOLVED that this Honourable House debate this motion with a view to finding creative solutions to the current problems of inadequate design, poor repair and maintenance of the existing networks of drains and gullies throughout the Corporate Area, Montego and other towns;

BE IT FURTHER RESOLVED that this Honourable House direct the appropriate Committee to examine the current and future development plans of the Government to ensure that full account is taken of the need for adequate drainage systems to be put in place to address the various sources of increased water run-off, effluent and sewage.

### NOTICE GIVEN ON TUESDAY, 24TH NOVEMBER, 2020

3.  
3]

**Dr. Brown Burke – To move –**

[No.

WHEREAS the lives of most Jamaicans have been adversely affected by the COVID-19 pandemic through job losses, business closure, income reduction and health challenges;

AND WHEREAS the lives of many Jamaicans have also been adversely affected by the recent heavy rains and floods, which have damaged houses, roads and infrastructure, limited transit and access to various communities, and caused severe loss to farmers, livestock owners, and fishers;

AND WHEREAS all Jamaicans, not just members and supporters of political parties, should have fair access to jobs and benefits, regardless of political affiliation or non-affiliation or geographical location;

AND WHEREAS the Government of Jamaica (GOJ) has announced a number of needed programmes to mitigate these adverse conditions and losses and to assist many sectors of the society, including school children, farmers, fishers, and other vulnerable populations;

AND WHEREAS the GOJ, with reduced revenue and increased demands, must ensure fairness and equity in their distribution and avoid speculation of victimisation, discrimination, favouritism, nepotism, cronyism, and any hint at any issues, past and present, which, at various levels, have dogged previous administrations:

BE IT RESOLVED that a national oversight committee to monitor the distribution of state resources and benefits in a fair and equitable manner be established to ensure fairness and equity;

AND BE IT RESOLVED that said committee pay special attention to the distribution of additional benefits under the Programme of Advancement Through Health and Education, which should bear some resemblance to the national poverty map and the Survey of Living Conditions; the fair distribution of tablets to our school children; and enlistment for jobs in the Jamaica Defence Force, the Jamaica Constabulary Force, the Jamaica Fire Brigade, the community health sector, and other government entities, both at the national and local government levels;

AND BE IT FURTHER RESOLVED that, in the interest of transparency, this information be made available, at least in summary, on a parish, constituency, divisional and community basis to all elected representatives, and that the names of all beneficiaries, to include recipients of employment, be shared with the Integrity Commission.

**NOTICE GIVEN ON TUESDAY, 8TH DECEMBER, 2020**

**4. Mr. Mikael Phillips – To move –  
4]**

**[No.**

WHEREAS Jamaica attained independence on August 6, 1962, and will, therefore, enter its 60<sup>th</sup> year as an independent nation in 2021;

AND WHEREAS Jamaica's democratic system of government has withstood the test of time with the holding of thirteen (13) General Elections and the peaceful transfer of power seven (7) times to different political administrations;

AND WHEREAS Jamaica retained the constitutional monarchical system of government in 1962, with the Head of State being Her Majesty, Queen Elizabeth II of the United Kingdom, represented in Jamaica by the Governor General;

AND WHEREAS Jamaica's system of government has been the subject of review by a Constitutional Commission, a Joint Select Committee on Constitutional Reform in 1997, and by several eminent Jamaicans independently, which have recommended various constitutional amendments, including the adoption of a republican system of government;

AND WHEREAS credible opinion polls have indicated that a majority of Jamaicans would prefer that Jamaica adopt a republican instead of a monarchical system of government;

AND WHEREAS, while there are differing views on some recommended constitutional amendments, both political parties in Parliament have agreed that Jamaica should become a republic within the Commonwealth with a non-executive president as the ceremonial head of state;

AND WHEREAS political administrations formed by both political parties in Parliament have committed to the holding of an indicative referendum, a grand referendum or a simple referendum at varying times in relation to this and other matters, but have not done so:

BE IT RESOLVED that this Parliament mandate the government to:

- (a) Take the necessary steps in accordance with the constitution to remove the British Monarch as Jamaica's Head of State and establish a new Head of State of Jamaica to be known as the President of Jamaica;
- (b) Appoint a small committee of appropriate professionals to undertake a six-month public education exercise on the desirability of having a republican system of government instead of a monarchical one; and
- (c) Thereafter hold a national referendum to approve the necessary constitutional changes;

AND BE IT RESOLVED that, as a cost-saving measure, the said referendum be conducted at the same time as the Local Government Election which is due on or before February 2022;

BE IT FURTHER RESOLVED that Jamaica take these immediate steps to finally repatriate this fundamental symbol of Jamaican sovereignty (the Head of State) to our homeland, Jamaica, land we love, prior to our celebration of 60 years as an independent nation.

**NOTICE GIVEN ON TUESDAY, 2ND FEBRUARY, 2021**

**5. Mr. Clarke – To move –**  
**5]**

**[No.**

WHEREAS the Expanded Programme on Immunization (EPI) in Jamaica has achieved numerous milestones, with the nation having seen its last case of locally transmitted polio in 1982, measles in 1991, diphtheria in 1995 and rubella in 2000, and with over 90% coverage in 2018 of children under 12 months with the BCG, haemophilus influenzae Type B, hepatitis B and other vaccines;

AND WHEREAS vaccine-preventable disease in children has plummeted and the WHO vaccine-preventable diseases 2020 global monitoring system has indicated no reports of these infectious diseases in Jamaica;

AND WHEREAS the EPI does not, however, robustly address vaccine-preventable disease in adults;

AND WHEREAS over the last 20 years, in the USA, the role of pharmacists in immunization delivery has expanded, significantly improving the rate of vaccination among adults, and it was found in 2016 by noted researchers in that jurisdiction that pharmacists' involvement in immunization, whether as educators, facilitators or administrators, would likely result in increased vaccine uptake when compared to vaccine provision by traditional providers alone;

AND WHEREAS the European Interdisciplinary Council for Ageing (EICA), which brought together stakeholders from the medical and pharmacy professions, the pharmaceutical industry, patient/ageing organisations and health authorities, found that access to vaccines can be improved by enabling community pharmacists to vaccinate;

AND WHEREAS pharmacists are increasingly being granted the authorization to administer vaccines in a number of other countries, including Argentina, Australia, Canada, Costa Rica, Denmark, France, Ireland, Italy, New Zealand, the Philippines, Portugal, South Africa, Switzerland and the United Kingdom;

AND WHEREAS after two influenza seasons, an analysis of pharmacist-administered influenza vaccines in Ontario, Canada, demonstrated a net immunization increase of almost 450,000 (3% of the population), with pharmacists vaccinating approximately 765,000 people per year;

AND WHEREAS pharmacists have joined the front lines of the COVID-19 fight, and the intention in the USA is to expand their role in combatting the pandemic and increase the number of providers who administer vaccines:

BE IT RESOLVED that this Parliament consider allowing pharmacists in Jamaica who have attained the following qualifications:

1. a doctorate in pharmacy, with emphasis on clinical expertise or training; or
2. a master's degree in pharmacy, with emphasis on clinical expertise or training;  
or
3. an undergraduate degree in pharmacy, with more than five years' experience as a community pharmacist,

and who have undergone immunization training certified by:

- (a) the relevant authority in Jamaica; or
- (b) an international immunization accreditation body

to be empowered to administer approved vaccines in adults.

WHEREAS our responsibility as policymakers is to create the economic climate and mindset that will grow the Jamaican economy in a way that increases per capita income for all our citizens;

AND WHEREAS we have repeated for decades that our national trade policy is export-driven and this position was reiterated in a recent policy document: ***“At the national level Jamaica’s trade policy can be said to be always export led, even when the country introduced an import substitution policy in the 1950’s...”*** (National Trade Policy 2019, Ministry of Foreign Affairs & Foreign Trade);

AND WHEREAS, notwithstanding this stated policy, over the past ten years we consistently imported four times more than we exported;

AND WHEREAS our import substitution policy, which is broad-based and still being pursued today, is a dead-end for several industries and has not created an export driven economy or led to any significant export of manufactured goods despite substantial duty protection;

AND WHEREAS over the past forty years the Jamaican economy has seen only anaemic growth and per capita income has grown only marginally in real terms while that of other countries has grown appreciably;

AND WHEREAS few, if any, countries in the world have ever created true wealth for their people without developing their exports in both goods and services:

BE IT RESOLVED that this Honourable House debate methods of achieving a fundamental mindset shift to structurally transform Jamaica’s economy into an internationally competitive value-added export country focusing on products and services in which we can identify a global competitive advantage;

AND BE IT RESOLVED that we commence a process of strategic global repositioning based on a “foresighting” of global opportunities and a careful analysis of the goods and services in which we have or can develop a competitive advantage;

AND BE IT FURTHER RESOLVED that Jamaica pursue strategic global repositioning not as a one-time action, but as a process of continuous innovation that fosters agility in recalibrating and improving production so as to secure and sustain a competitive advantage, given rapidly changing global and technological developments.

## REFERRED TO COMMITTEE

### **06.10.2020**

1. Special Select Committee of the House appointed to sit jointly with a similar committee to be appointed by the Senate, to consider and report on the Bill shortly entitled "*The Sexual Harassment Act, 2020*".
